KAESER COMPRESSORS

Portable Compressors

with the world-renowned SIGMA PROFILE

Innovation

MOBILAIR M 26

Free air delivery 2.6 m³/min, 92 cfm

MOBILAIR M 26

portable compressor with SIGMA PROFILE

Enough capacity for two breakers

The M26 is designed for high performance on the construction site.
It is quiet-running and thrifty on fuel but has the power to drive two breakers.

- Compressor airend with SIGMA PROFILE rotors – more air for less power consumption
- Efficient 1:1 drive gives optimum power transmission, low rotational speed and long life
- Water-cooled, 3-cylinder Kubota engine with plenty of power in reserve

Lightweight and service-friendly

High performance doesn't necessarily mean heavy weight.
Despite its high power, the M26 is still a compact, lightweight package.

- Modern, rotation-moulded, double-skinned sound enclosure that is non-corroding, scratch resistant and weatherproof.
- Optimum accessibility and ease of maintenance
- Operational weight under 500 kg, manoeuvrable and compact

Automatic anti-frost regulation – condensate-free air

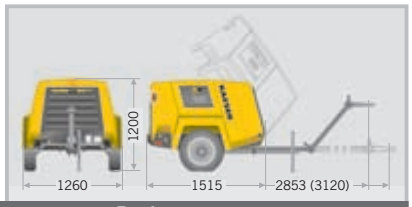
A patent application has been made for this device which is specially developed for portable compressors to automatically regulate operating temperature in relation to ambient.

- Prevents breakers freezing up
- Extends the life of air tools

Everything safely under control

The user-friendly control and instrument panel gives all information at a glance.
The red rotary switch controls all functions.

- Simple operation from a single switch
- Easily-understood pictograms guide the operator



Model	Compressor unit		Three-cylinder diesel engine					Package
