

Pneumatic Plier

Model JK20T777L

Staple JK777
"wide ribbon"

The JK20T777L heavy duty pneumatic plier stapler is designed to drive medium crown 1/2" (12 mm) staples into corrugated and solid fibreboard for fastening of two thicknesses of double wall or four thicknesses of single wall board.

This is a lightweight tool, yet built with the durable Josef Kihlberg quality, featuring wide mouth opening, deep throat, easy quick load, using JK777 "wide ribbon" staples in three leg lengths from 3/8" to 5/8" (10 mm to 16 mm).

The unique design provides pre-compression of corrugation as the staple is driven, which insures a tight clinch without breaking the surface area of the board.

The jam clearing mechanism provides easy clearing of jammed fasteners preventing costly down time.

For easier service and maintenance of this tool, sets of spares are available, containing parts that are most subject to wear.

Technical data

Length	370 mm (14 1/2")
Width	65 mm (2 5/8")
Height	250 mm (9 7/8")
Weight	2.0 kg (4 lb 6 oz)
Throat opening	22 mm (7/8")
Throat depth	140 mm (5 1/2")
Magazine capacity	100 staples
Air pressure	5-6 bar (70-85 psi)
Air consumption per stroke at 6 bar	0,3 litre
