## CA-4-4H

**The leader in walk-behind trowels gives construction professionals a machine that allows them to work in spaces too tight for conventional trowels.**

The CA-4-4H walk-behind trowel is only 24 inches (61 cm) wide making it ideal for finishing in tight spaces, through doorways, against walls or around difficult obstructions without leaving a trace. Driven by a 4-horsepower Honda engine, the lightweight trowel has a heavy-duty manual clutch and QuickPitch handle, allowing the operator to react quickly to changing concrete conditions by raising or lowering the blade pitch in 1/8-inch (0.3 cm) increments by simply squeezing the latching lever.

### **Performance Data**

Number of Blades: 4

Ring Diameter - IN (CM): 24 (61)

Clutch Type: Centrifugal

Pitch Control: Quick Pitch

Rotor RPM: 70-130

### **Power Source**

Engine Model: GX-120

Electric Motor: Honda

### **Dimensions**

Shipping Weight - lb. (kg): 145 (66)

Operating Weight lbs. (kg): 125 (57)
