

## Porto-Screed

**One-Operator Vibration Screeding Strikes Off a Stiffer Mix. Cuts handwork. Cuts cost. Stow's Porto-Screed saves time and money on countless jobs, large and small. Its vibrating action takes the backache out of screeding, making it a simple, one-person job.**

### MODEL PSH

- | Rubber mounts effectively isolate the operator from vibration
- | Top vibrating speed and amplitude let you pour and strike off a stiffer mix
- | The vibrating action brings fine aggregate to the surface without the bother and scars of sawing, getting you off the pour quicker
- | Porto-Screeds are designed to take twin beam lengths of 2x4s up to 16 ft.
- | The unit is a lightweight 75 lbs
- | Stow Porto-Screeds are available with a 4.0-HP Honda engine, delivering 4,300 vibrations per minute
