Vibra Strike I

The original Vibra Strike single handle vibratory screed, better known as the **Vibra Strike I**, shown fitted with **Lindley Incorporated's original F1 Pan Style Float**. This is the float that started it all. Back by popular demand. This float is the choice of many original Vibra Strike owners when the time comes to replace their aging equipment.

Vibra Strike Rattler

The **Rattler** is a self-contained, gas powered, concrete vibrator that is simple to operate, even for the single worker.

By integrating the powerful yet compact Robin engine, the Rattler eliminates the need for bulky backpacks, restrictive straps, and dedicated power sources.

The result is an efficient and affordable vibrator that can strike when and where you need it.

Vibra Strike II

The Top-of-the-Line In Power Screeding.

The Vibra Strike II is just as quick and versatile as the original, and with the 4 stroke engine this is a power screed that delivers performance. Think of it as a Vibra Strike I with an attitude.

Shown fitted with Lindley Incorporated's 2 in 1 float, the mark again is raised, with respect to portable, easy to use screeding equipment. The new one piece design eliminates over 60 nuts, bolts, studs, washers, tensioning rods, and brackets. By reducing this many parts from the float, overall functionality is greatly improved. The unique geometric shape of the float allows it to be used as both a float and curl edge, when screeding from the top of forms. A one piece extruded magnesium shape means fewer parts, and easy cleanup.

Try it and you'll see! The Vibra Strike I and II are the most productive screeds you will ever use. Call 1-800-788-5997, or ask your dealer for a demonstration video.
