Tip: Stack soft products such as VCT & carpet tile to make multiple cuts at once!

Janka Hardness Rating

The Hardness of Solid Wood

Our Magnum Shears™ cut a wide variety of products but we recommend cutting solid wood flooring no harder than 1250 on the Janka scale, and engineered wood flooring no harder than 1400. See the chart at left for an example of hardness ratings*.

*Note: Due to extreme variations in wood density, the Magnum Shear™ may or may not cut the products listed above.
