RG 13

- Operator Presence Shutdown
- RAYCO** Super Tooth Cutting Tool Standard on All Models
- Commercial Grade Performance
- Chips Contained by CHANNEL FRAME
- Two Year Limited Warranty

This complete line of walk-behind stump cutters is built for commercial work. The Mini Work-Force consists of three models in 13HP - 20HP. The RG 20HD is self-propelled with a 20HP Kohler engine. The 13 horsepower models are powered by single cylinder Honda engines, while 20 horsepower models employ Kohler command, twin cylinder engines.

The simple design makes these machines easy to understand and operate. The channel frame design deflects the chips and spoilage under the unit, reducing the chance of injury to persons and property. The operator presence switch automatically shuts off the engine upon leaving the safety of the control area.

For added utility the RG 13 and RG 20HD models may be towed over the road, or all the models fit conveniently on the custom **RAYCO** trailer.

RG 13 - SPEC DATA	
Weight	420 lbs
Length Range	66 - 90 inches
Height Range	32 - 59 inches
Width	31 inches
Frame	7 gauge hot-rolled steel
Tires	4.80-8
