DINGO TRENCHER 6"

TORO 22459  
Inventory #: 5718

The versatile Toro Dingo trencher can be used for a variety of jobs from tree planting to irrigation installations and more! 2 or 3 foot boom configurations are available to meet the needs of different job conditions. The Toro direct drive system provides a large hydraulic motor and provides more torque. The large motor also requires less maintenance and provides a very long life. The heavy duty nose roller bearing lasts longer providing less "shock" to the trencher assembly and chain. The high abrasion resistant boom allows for long boom life. The chain tensioner is specifically designed for easy access and low maintenance; it allows the operator to easily adjust the chain tension to fit the job conditions.
