

Metal Detectors

American Made since 1950

The White's Story

Today, every White's metal detector is built with the same philosophy my family started the company with over 50 years ago, "Give our customers the world's best metal detectors and build them right here in Sweet Home, Oregon."

We're proud of the quality and performance built into every White's metal detector. And we're proud to remain a "Made in the U.S.A." company!

Kenneth White

**New for
2009!**

3x3 TARGET ID™ SYSTEM!

SEARCH

New ways to interpret target information using ALL of the data collected from each detection frequency!

The **Search** screen's **SpectraGraph™** displays each of the 3 frequencies; 2.5 kHz, 7.5 kHz, and 22.5 kHz.

ANALYZE

Once you've detected a target, **Analyze** shows target size and characteristics at each frequency.

PINPOINT

Finally, the **Pinpoint** screen shows signal strength at each frequency.

10 Pro-Designed Turn-on-and-Go! Programs

See it all in HD Color! Icons, Spectra-Graph™ target signature, and depth.

Real-time adjustments! Use the Live Controls on the bottom of the screen.

QUICK LOOK

- Wireless SpectraSound™ Headphones
- 3 Optimized Hunting Frequencies
- Live Controls for Real-Time Adjustments
- Spectra-to-Spectra Wireless Program Transfer
- 10" DD Search Coil
- Selectable Ground Filters
- Color-Keyed Disc Pattern
- Recovery Delay
- Dozens of Expert Menu Options
- NiMH Rechargeable Battery System
- Adjustable Backlight
- Owner Registration
- Two-year Parts and Labor Warranty

I have a "vision" that White's new V3 three frequency detector is going to pay for itself in no time. The 22.5 kHz channel is super hot with gold - large or small. My first two jewelry finds with the Spectra V3 were a 14K bracelet with 36 diamonds and shortly after that a large men's class ring. I don't think I would have dug the bracelet with any other detector because I had a foil ID of +02 on the SpectraGraph, but the target audio "talked" to me and I had the feeling that I just had to dig this one. I'm sure glad I did and thanks White's, this detector is a keeper.

L. Fillman

Spectra® V3

The next big thing in metal detection is here! V3 takes treasure hunting to a whole new level of performance and depth.

V3 is equipped with plenty of new bells and whistles including wireless headphones, color display, and program transfer. These are sure to make your hunting more fun than ever. But the true measure of a better metal detector? **“Does it go deeper? What are you finding?”** And here’s the answer: V3 users are digging older, deeper coins, relics and jewelry. In places hunted time after time with other top-of-the-line metal detectors.

Custom-built wireless headphones “sync” with Spectra V3 in just a couple of steps!

Videos, charts, field reports, and more ...
www.whiteselectronics.com/v3

It has only been a week since I purchased my new V3 and I must say, it is a very nice detector. I have found over 300 coins including 5 wheat pennies, 3 Indian Head pennies, 1 Mercury Dime, 1 Barber Dime, 2 Silver Dimes, 1 silver quarter, 1 Barber quarter and 1 V nickel. Hunting at a old house, I dug two separate wheat pennies at 6 to 7 inches which were masked by nails and steel wire. That was the first time I have dug coins with so much junk around them! This is my 3rd White's detector.

Ron Mallison

Why DFX™?

DFX's "sharpshooter" approach to multiple frequency concentrates the power for maximum depth and dead-on target info.

DFX transmits 16 powerful frequencies and processes 2 concentrated, voltage-packed frequencies. The result? Optimized depth and target information.

QUICK LOOK

- 9 Turn-on-and-Go! programs. Use the Pro-designed hunting programs or your own custom programs.
- Multiple Frequency Operation. Optimal ground penetration! Use 3 kHz, 15 kHz, or both at once.
- DSF™ Digital Signal Filtration. Change your ground filtering to optimize depth in mineralized grounds.
- Sweep Speed Adjust. Higher settings for areas with few targets, and lower settings for trashy areas.
- Hot Rock Rejection. A complete accept/reject range.
- 10 Basic Adjustments and 34 Pro Options.
- Complete Visual Display. Target icons, VDI numbers, SignaGraph® target signature, and depth reading.
- Automatic Ground Balance with AutoTrac®. Tracks and adjusts to changing grounds as you hunt.
- High-definition megapixel display.
- Powerful, waterproof 12" spider search coil for optimum depth and versatility. (Also available with 9 1/2" search coil.)
- Slide-in Nicad Battery System. Up to 15 hrs. of hunting on a charge. Backup penlight pack included.
- Two-year Parts and Labor Warranty.

Easy-navigation menu ...
just pick a program and go!

Listen for the sound of treasure,
then see what you've detected.

Then pull the trigger and see
how deep to dig ...

I found an old cellar hole this week and my DFX is laying waste to it. To date, in 3 trips (about 6 hours of hunting), I've found a 1787 8 Reale (both pieces of which were cut in half), a 1741 2 Reale, 9 Connecticut Coppers, 5 King George Coppers, an 1827 Large Cent, and 7 other Large Coppers. I also found several dozen buttons and half-dozen buckles.

Dave Z., New York

DFX™

Choose DFX™ for all-out horsepower to find those older, deeper targets.

DFX™ is legendary in its ability to find treasure; older, deeper, smaller items that other detectors pass over.

DFX™ brings together sophisticated microprocessor technology, and turn-on-and-go simplicity. You're out hunting right away, but there are plenty of adjustments, too.

White's patented multifrequency method partners with the target I.D. to "see through" minerals in the ground and detect coins, jewelry and relics other detectors miss. Hunt in 3 kHz or 15 kHz (the two best frequencies for finding treasure) or use both together for unequalled hunting.

Dozens of features come together in the DFX™ to create one of the world's best metal detectors. It's built on White's proven digital platform, with the features that give you more flexibility to find it all!

**DFX is also available with a 9 1/2" search coil*

DFX 300

msrp

I've been metal detecting for about 10 years now and about 2 years ago I purchased a DFX. Since then I have seen my coin collection grow. I am truly amazed at the depth of my DFX. Some of my best finds with the DFX include a 1921 Morgan Dollar, 1838 Coronet Large Cent and an 1849 Coronet Large Cent. I have found over 100 silver coins at depths between 1 and 13 inches. I detect in older parks and new parks, and every time I go out I know I will come home with something.

Dave H., Ohio

FOR A WHITE'S DEALER NEAR YOU 1-800-547-6911 whiteselectronics.com

The results with the 12" coil on my MXT were exceptional! At the end of the day, I found 2 gold rings and 1 silver ring with small diamonds, the equivalent of about \$50.00 in foreign clad and many other items (too numerous to mention). The man's gold ring was 10" deep.

Dan O.

QUICK LOOK

3 separate, easy-access hunting programs with unique target responses, display info. and audio frequencies.

• **COIN & JEWELRY** • **RELIC** • **PROSPECTING**

3 easy-adjust controls:

GAIN maximizes sensitivity and depth.

THRESHOLD allows you to hunt with a slight hum or hear only the sound of detected targets.

DUAL control fine tunes discrimination in the Coin & Jewelry and Relic programs. In the Prospecting program, adjusts the S.A.T. speed.

Automatic Ground Balance keeps the detector perfectly balanced even in harsh grounds.

3-position Mode switch. Works with your hunting program. Pull the trigger and the Pinpoint mode "zeros" in on detected targets.

Operating Frequency - 15 kHz

Drop-In Battery Pack. 40-hour operation from 8 "AA" batteries (Nicad Rechargeable system available.)

Waterproof 300 mm (12") search coil for maximum depth. Compatible with Eclipse accessory search coils.

Two-year Parts and Labor Warranty.

Easy-navigation menu ... just pick and program and go!

Listen for the sound of treasure, then see what you've detected.

Then pull the trigger and see how deep to dig ...

This morning I took my MXT out on its maiden voyage to a spot we have been hunting recently. I found the MXT to be easy to set-up and easy to use.

Today, I was accompanied by my oldest daughter and the MXT with Super 12 helped us have a great day. We found a total of 5 General Service Eagle buttons and several .58 mini balls and 1 Sharps carbine during the hunt. However, I was most thrilled with the buttons. We found 5, this was my best button day ever!

Dave K, Florida

MXT™ is 3 metal detectors in one.

A versatile high performance detector that's as comfortable hunting for coins in the park as it is relic hunting an old battle site. Plus, it's designed by prospectors for the tough task of finding gold.

MXT™ combines easy operation with all the performance and versatility you need to find coins, rings and jewelry, relics, and gold nuggets.

"I want to do a little prospecting, but I also want to hunt for coins and try a little Civil War relic hunting."

MXT is your detector!

**MXT is also available with a 9 1/2" search coil*

*Field Report, Engineering Guide,
and Customer Stories*

I decided to hunt an area that my hunting partners and I had hunted many times over the past year. Today I decided to hunt the more difficult terrain. I set my MXT in the relic mode, and after about an hour I got a good signal reading buckle and 72 VDI. I dug down about 10 inches and finally saw the outline of a round disk. I was certainly surprised to find that it was a 1793 or 1798 Pillar Dollar Piece of Eight. Even more surprising was that the owner of this coin had engraved his name on the reverse of the coin - "Akin Miller's money" is what was etched into the coin. It's hard to tell how many times we had passed over this coin as we hunted, but the MXT found it.

Mike O.

My White's Prizm III proved its worth as an awesome relic hunter this morning. I was hunting a private yard of an early 1800's house and much to my delight I found this Standard issue Civil War Union Army belt buckle. White's does it again!

Bill, Maine

QUICK LOOK

- **Automatic Ground Balance** with Fast Tracking eliminates ground minerals in a snap! Improved performance in all kinds of ground conditions.
 - **VDI - Visual Discrimination** Indication numbers readout to provide precise target info. A top-of-the-line White's feature!
 - **Adjustable Notch Discrimination.** 9 notches cover the full target range.
 - **Back-lit Display** with Sensitivity Graph, target ID, VDI number, Depth Reading and Battery Strength.
 - **VCO Pinpointing** gives a higher pitch as you approach the target.
 - **Beach Mode** for increased performance on the hard-to-hunt ocean beaches.
 - **9-inch waterproof spider search coil.**
 - **Long-life, snap-in "AA" battery pack included.**
- Plus, all of the treasure-finding Prizm features.**

Prizm III & IV

\$299.95
msrp

\$399.95
msrp

PRIZM™ III and IV feature:

Target I.D. Display shows I.D. of target as you hunt. Hear *and* see targets!

Depth Reading as you hunt. Detect a target and the screen shows you how deep to dig.

5-Range Discrimination adjusts so you hear and see it all, or just the good stuff.

Adjustable Sensitivity maximizes depth in varying grounds.

PinPoint/All-Metal Mode makes locating targets a snap.

9-inch waterproof spider coil.

Rugged, water resistant control box. Just 2.5 lbs., too.

Low Battery Alert. Powered by 2 9-volt batteries (included).

1/4" headphone jack.

Two-year warranty.

PRIZM™ IV also features:

Smart Notch. You choose to detect or ignore nails, foil, tabs.

Tone I.D. LOW tone signals nails and iron. MEDIUM is rings and jewelry. HIGH indicates coins.

Prizm 6T

The 6T combines high-end features like Auto Ground Balance and VDI numbers with Prizm simplicity!

Like all Prizm's, the 6T is rugged and lightweight for all-day hunting. See what's in the ground and how deep to dig on the easy-read display. Adjust the DISC control up and down depending on where you're hunting. Use low settings in yards and on private property. High settings filter out junk in high traffic areas.

6T is loaded with all of the proven Prizm features, plus the latest in metal detection circuitry and software. The result? A detector that's fun to use and finds more treasure!

\$699.95
msrp

Prizm V

Built with White's legendary quality and performance, Prizm's are perfect for the first-time treasure hunter.

PRIZM™ V features:

MultiTone™. Deluxe Tone I.D. Hear instantly whether it's a nail, ring, or quarter! 8 distinct audio tones range from VERY LOW for nails up to HIGH for silver dollars. If you prefer the Prizm IV-style 3-tone I.D., it's here, too!

VCO Pinpointing. Voltage Controlled Oscillation gives a higher pitch as you approach the target. It's a simple and intuitive way to pinpoint. Prefer standard, volume-controlled pinpointing? It's here, too!

Prizm™ 950 search coil. The same top-of-the-line coil found on White's DFX and MXT. Increased depth and a wider search pattern.

Plus, all of the proven Prizm features at left.

FOR A WHITE'S DEALER NEAR YOU 1-800-547-6911 whiteselectronics.com

After I got the new M6, I immediately headed off to coin hunt a rural churchyard which has been hunted many times in the past, by many different folks. If there is one thing I have come to believe over the years, it is that no one area is ever completely hunted out. And, although the churchyard didn't fill my pockets with old coins on this day, I did manage to find three old Wheat cents, a silver quarter and a nice old pocket-knife. And, in doing so, I proved my "never hunted out" theory.

Randy

Parks, playgrounds, yards - even the beach. Here is a high-performance metal detector that will find coins and jewelry in all kinds of ground conditions. Just 3 controls ...

- ▶ **DISC control with easy-set labels and 2 Preset settings**
- ▶ **Full Range SENS Control - adjustable for maximum depth**
- ▶ **High performance in all grounds - 2 Auto Trac Settings including one for saltwater beaches.**

Here are a few of the nicer nuggets I have found here in Eastern Oregon, using the Goldmaster. It was passed down to me after my husband purchased an MXT. We have been detecting old tailing piles. I am learning to really like the iron ID on the Goldmaster. It saves me from digging the junk that these tailing piles are notorious for. All in all, we pulled out over 3/4 of an ounce that had been left behind.

Sheila, Oregon

I have used the Surf Dual Field P.I. for about six months and feel that with variable pulse delay and a twelve-inch Dual Field coil, I walk on any black or white sand beach with the best machine on the market!

Lance Rigg

P.S. My nick name for the P.I. is the "Beast" because of the extra depth it provides me on the beach!

Two patent-pending coils for superb sensitivity to small targets from the inner 6" coil and excellent overall depth from the outer 12" coil.

FEATURES

- Dual frequency detection provides optimum detection on the sand and in the water.
- Two Search Modes: Toggle between All-Metal and Motion Discrimination for easy pinpointing and versatility.
- Epoxy filled, near-neutral buoyancy 12-inch spider coil for extreme depth on coins, jewelry and other treasure.
- 3 Controls - Threshold, Sensitivity, and Ground. The versatility is all here!
- Salt and Freshwater versatility for all kinds of beach hunting.
- Waterproof Piezo headphones included.
- Drop-in "AA" battery system and battery test.
- Detachable control box with hip or chest-mount pouch included.
- Completely waterproof to 25 feet.
- Two-year Parts and Labor Warranty.

Surfmaster Dual Field

The Surf PI Dual Field combines turn-on-and-go ease with extreme depth and sensitivity.

The PI's powerful circuit and dual field coil detect deep even in the worst beach grounds, like black sand.

\$899.95
msrp

FEATURES

- Pulse Induction detection for extreme depth on coins and jewelry, especially in saltwater and mineralized ground.
- Waterproof to depth of 100 feet.
- Adjustable Pulse Delay reduces black sand noise. Quieter on the beach, more targets!
- 12" dual field spider search coil. Near-neutral buoyancy.
- Sensitive to gold even at maximum depths.
- Gain control adjusts for your particular beach conditions so you get every inch of PI depth.
- Quick Target Recovery. Hear good targets even amid junk.
- Tuner adjusts threshold tone and checks battery.
- Variable sweep speed, from slow to fast with no loss of depth.
- Waterproof Piezo headphones.
- Auto. Ground Rejection.
- Power: 8 "AA" batteries.
- Two-year Parts and Labor Warranty.

BeachHunter 300

The BeachHunter® 300 ignores junk and picks up just the treasure. Hunt in and out of the water.

I.D. detected targets in a snap with a glance at one of the color-coded LED's.

... It took several scoops to finally reach the target, a vintage WWII .50 caliber machine gun shell casing over 15" deep.

*Andy Sabisch
Lost Treasure, July '08*

\$999.95
msrp

I want to thank everyone at Whites for putting the new "SUPER 12" coil on the Beach Hunter ID! I have been using it on saltwater beaches of the North East. The results have been impressive.

So far it's got me loads of coins, a very deep silver quarter, a gold earring with diamonds, and a lovely old silver ring! Also, lots of other assorted jewelry items.

I can't wait til the next Nor'Easter rips up our beaches. I know this detector is going to clean up big! I'll keep you posted on my finds.

George

Andy Sabitsch writes in Lost Treasure, Oct. '08 ...

Less than 20 minutes after getting started, I hit a solid signal that produced a low-pitched tone and, after digging down nearly 12", I pulled out a nice Colonial-era flat button. While lacking any markings, I was

impressed at the response the TDI had produced on a target that was that deep and covered with layers of tall, salt marsh grass.

(Read this complete TDI field test, and another on prospecting at whiteselectronics.com)

QUICK LOOK

- Full-control Ground Balance. Quickly balance out the iron mineralization of hot rocks, black sand, and other tough grounds.
- Adjustable Pulse Delay - Settings from 10 microseconds (best for finding gold nuggets) to 25 microseconds (for relic, coin and beach hunting).
- Variable Audio Select with Ground Balance "ON"
- 3-Way Target Conductivity Selector allows variable audio to hear either only low conductive targets like most gold nuggets, or high-conductive targets like silver coins and large relics, or both. This unique ability aids in identifying trash, too.
- Threshold Control. Accurately adjust the audio to hear the smaller, deeper signals.
- Frequency Control adjusts for hunting near power lines, microwave or other environmental interference.
- Battery Life L.E.D. lights.
- Waterproof 12" spider search coil. Other accessory coils available.
- Two powerful 14.4 Volt Lithium-Ion Rechargeable Battery Packs included.
- Two-year Parts and Labor Warranty.

Selectable Conductivity and Adjustable Pulse Delay are two features unique to the TDI.

They not only aid the Gold Prospector in enhancing the detection of Gold, but allow Coin, Relic and Beach Hunters to enhance the detection of their specific targets as well.

Photos from Moore Creek, Alaska, where 1/2 dozen new detectorists found their first nuggets with the TDI!

PulseScan TDI™

Finding gold was just the beginning! TDI was originally designed for prospecting; now optimized for exceptional performance for relic, beach, even coin hunting.

Professional-level ground-balancing, pulse induction detection. Unlike any other metal detector on the market today, the TDI is capable of remarkable depth and extreme sensitivity in the worst grounds.

Pulse Induction detection is unsurpassed for raw depth and sensitivity. The TDI offers the serious detectorist full adjustability on the features needed for tough hunting conditions. Rooted in the challenging conditions of prospecting for gold, the TDI has special features for relic, beach and coin hunting, too.

Hip and chest-mountable!

\$1599.95
msrp

TDI owes its existence to Eric Foster, widely regarded as the "Father of Pulse Induction".

Eric has spent many years developing technology and methods that have produced some of the deepest-detecting metal detectors in the world.

Dan Geyer, White's Project Engineer, has spent countless hours with Eric developing and polishing TDI for Whites customers. The results are a dream-come-true for White's professional users who insist on the deepest!

This is a copper brooch I found at a Union camp on the approach to Shiloh, 1862. While the brooch probably has little monetary value, the depth (over 12") of the big piece and the small piece (14 to 16" deep) is very impressive. The brooch is amazing in that it is so fragile and intricate. By all rights it should have come apart over the years. This brooch belongs in my Civil War collection because in all likelihood it was either a "sweetheart memento" or was lost by a camp follower.

Pete Pedersen

Passing the TM 808 over the foundation where an early 1900's house had been, it sounded off with very high intensity, I began digging, and at a depth of 1.5 ft, I uncovered a cache that had a tin covering over it. As I removed the tin from the cache, I found it contained Mexican Silver Pesos dating 1920-1927. There were over 1,000 coins in the cache. I recommend the TM 808 to anyone hunting for caches and or deep buried treasures.

Gomez, Texas

I was out detecting at a site that had been pounded in the early 80s. It is on the banks of the Hudson River and used to be a dance hall in the 1800s. My machine locked on with a nice 17 VDI. As I flipped the plug I noticed what looked like a gold cross. I quickly picked it up and rinsed it off. I noticed a small gold tag attached to the cross with a crude piece of wire. It was an octagon shaped coin, a wonderful 1871 California 1/4 Gold dollar. These fractional gold coins are amazingly small and very thin. This coin was found in an area where I know others have been in the past and they missed this little guy. But my XLT sure didn't!

Kevin in New York

One place my treasure group enjoys hunting is the old WWI Camp Logan where 40,000 troops passed through 1917-1918. One item I found was a dog tag with the name Clde C. Dace on it. I found death records that indicated he made

it through the war and passed away in Texas in 1970. None of the Dace's in the Texas phone books knew Clyde so I gave up the search for a relative. A few weeks ago his daughter, responded to my internet post after Googling her father's name. We got in touch and I was able to return a precious item her father lost 90 years ago!

Tim, Texas

On a weekend trip, we brought along the Prizm III. My sons were talking about how they wanted to find a ring. The the last day of our trip, as my sons were going down the beach with the metal detector, they got a good signal and started to dig. My 10 year old son said, "It's a ring!". They found an 18k gold 1.24 carat diamond ring! The retail value of the ring is \$11,000! Talk about a find of a lifetime!

This picture contain the coins I have found in 2008 - totaling 19,311 - including 2040 quarters, 3900 dimes, 1740 nickels, 16 Liberty dollars, 6 JFK halves, 5 Indian head pennies, 139 wheaties, 3 buffalo nickels, 11 silver dimes (2 seated Liberty, 4 Barber, 3 Mercury & rest Rosy dimes), 3 silver halves (2 Barber, one seated Liberty) one half silver dime, I have also found 43 rings, 23 silver necklaces, 24 silver and gold bracelets, earrings, broaches, charms, tokens and etc. Being a retired Deputy Sheriff, I can now do what I want to do with my time. Thank you White's, you make a great detector.

Sincerely, Bill

After practicing with our new MXT, we decided to go to a field we had gotten permission to search. In just a few minutes I got a signal for "Bullet" and the whole pack began to dig. My son (10) said, "There it is!" He reached down and pulled out a civil war bullet with three rings around the bottom. I will never forget what he said next, "Just think Daddy, I'm the first person to touch this in over 200 years." That bullet may not be a treasure to some but it is priceless to me.

Tim, TN

Treasure!

I started hunting in August '07, when my wife presented me with an XLT that she purchased for my birthday. Soon enough, I was finding gold and silver jewelry, old coins and treasure of every sort. My best find was a Barber Dime dated 1895 and minted in New Orleans. It is a rare coin and worth a great deal of money! When the MXT 300 came along, I just had to have one of those as well. There is rarely a day that it doesn't turn up gold or silver.

M. Taliesin

This past weekend I went out for a total of 4 hours with my Surf PI at Waikiki and another location down on the west end of Oahu, among the coins and pull tabs I found these beauties, the silver ring is a Tiffany & Co with a small diamond. I can't wait for the weekend so I can get back out in the ocean and find my wife and kids some more jewelry! Aloha ...

Lyle, Hawaii

I was searching one of my early pre-Civil War campsites here in Kansas using my White's MXT and finding a few early buttons and coins. All of the sudden I got this faint signal and a reading of +47 on the VDI. Digging down about 9 inches, I saw this gold coin appear at the bottom of the hole. It was a beautiful 1844 \$4 gold coin! I returned two days later and found a second gold coin. It was much shallower and the plow had given it a few scratches, but it is a gorgeous 1847 \$10 gold coin! Thank you White's, for making a "find of a lifetime" possible!

Steve, Kansas

After digging bullets, buttons, and a soldier's pocket knife, I was sure we were in a little camp, and my next signal was very solid. I dug down and removed the sod and felt a round object. When I got it out, I could see the Eagle! It was a Breast Plate! I have dug lots of Civil War relics with my MXT. I own 2 XLT's and 2 MXT's. They are simply the best, most durable and easy to operate detectors available.

Tim G.

Specialty Detectors

Sierra Madre/ULA-3 was designed for both industrial use and serious treasure hunting when searching for large and deep treasures and metal items. The Sierra Madre has a 9 1/2" standard search coil. With the optional 15" search coil, it is capable of depths up to 5 feet. Two-year Parts and labor warranty. \$599.95
Packed with both English and Spanish manuals.

PRL-1 is designed to locate property stake pins, valves, sprinkler heads, shallow pipes and cables. It is easy to use, and can be adjusted to either detect all metals or discriminate out junk. Two-year Parts and Labor warranty. \$399.95

PCL 600 accurately traces residential and commercial gas lines, water and sewer pipes and electrical cabling within access or service depths. 2 modes of tracing - "Clip-On" when you can access one end of the line, and "Inductive" when the line is completely inaccessible. \$499.95

Matrix^a 100 is designed to meet and exceed the needs and specifications in today's security conscious world and complies with all National Institute of Justice standards for indoor/outdoor operations.
 \$229.95
